| 基金評論 Fund Commentary   |
| 2024年第2季度，中國人壽澳門分公司開放式增長基金實現收益6.60%。<br><b>權益市場方面</b> ，2024年第二季度，中國經濟初現觸底回升跡象，恆生指數、MSCI中國指數本季分別上漲8.96%和6.38%。海外方面，美國通脹逐步降溫，經濟軟著陸概率增大，大型科技股引領標普500指數盈利增長，帶動指數上漲4.49%。展望2024年第三季度，我們對股票市場持謹慎樂觀態度。一方面，中國經濟動能仍然較弱，樓市也未脫離困境，而政府政策仍極有克製；另一方面，美國通脹下行曲折且估值已處於較高水平，板塊輪動將加速。基金將因應市場變化，動態調整各市場配置，分散風險。集中配置業務模式清晰、有定價權、有較強供應鏈管理能力的優質公司。在有確定性盈利增長和政策支持的板塊積極尋求超額回報。<br><b>固收市場方面</b> ，在經過一季度就業、零售到通脹全方面超預期後，二季度數據終於邊緣轉弱。自四月以來，失業率持續高於預期，非農新增就業出現不及預期或前值下修，通脹環比增速接連放緩。六月美聯儲公布點陣圖降息預期仍較一季度末減少兩次。議息會議後鮑威爾表示就業市場正在降溫，但需要更多通脹數據提振信心。歐央行如期降息25bps，但已被市場充分定價；同時上調通脹預期，且未給出進一步降息指引。中國方面，二季度美元債發行有所回暖，部分金融租賃、不良資產、央企與省級城投回到離岸融資市場，訂單倍數普遍強勁。上半年中資美元債整體淨發行深度為負，供需不平衡驅動信用利差持續收窄。2024年第二季度，JACI投資級和高收益指數分別錄得1.02%和3.46%的回報。隨夏季來臨，流動性有所走弱，疊加歐美等主要經濟體大選臨近，波動性或將放大。2024年下半年美聯儲首次降息的時間與次數、大選的結果及財政舉措將是市場關注的重點。<br><b>In Q2 2024, the Trust gained 6.60%.<br/>Equity:</b><br>In Q2 2024, China's economy started to show preliminary signs of bottoming out and rebounding, with the Hang Seng and MSCI China Indexes rising by 8.96% and 6.38% respectively this quarter. In US, the inflation gradually cooled down, increasing the probability of a soft landing. Large tech stocks led the earnings growth of the S&P 500 Index, driving the index up by 4.49%. Looking ahead to 3Q2024, we maintain a cautiously optimistic attitude towards the stock market. On one hand, China's economic momentum remains relatively weak, the real estate market is still in distress, and government policies are very restrained. On the other hand, U.S. inflation is declining in a bumpy manner, and valuations are already at high levels, which will accelerate sector rotation. The fund will dynamically adjust the market allocation and diversify risks, and concentrate on high-quality companies with clear business models, strong pricing power, and solid supply chain management capabilities.<br><b>Fixed Income:</b><br>After exceeding expectations in all aspects including employment, retail sales and inflation in 1Q2024, US economic data in 2Q2024 turned weak marginally. From April, the unemployment rate reported higher than expectation, non-farm payroll increased less than expected or the previous data revised downwards, and the month-on-month inflation rate slowed down for two consecutive months. In June, the Federal Reserve released a dot plot indicating rate cut expectations still two times less than last one. After FOMC, Powell said that the labor market was gradual cooling, but needed to see more good inflation data to bolster confidence. The European Central Bank cut interest rates as expected, but already fully priced in by the market. Meanwhile, ECB raised annual average headline inflation outlook but left further easing uncertain. In China, USD bond issuance picked up in the second quarter. Some financial leasing companies, AMCs, central SOEs and provincial LGFV returned to the offshore financing market. Order books were quite strong and most outperformed after issuance. Overall net issuance of Chinese dollar bonds was negative in 1H2024. Credit spreads to continue to narrow with the imbalance between supply and demand. JACI investment-grade and high-yield index recorded 1.02% and 3.46% in 2Q2024 respectively. As summer approaches, liquidity may turn weak while elections in major economies such as Europe and the United States could amplify volatility. The path of rate cuts, election results and following fiscal measures will be the focus of the market. |
