資產淨值 Net Assets	MOP 415.84 (百萬 millions)

美聯儲在2026年上半年維持息率不變。受經濟增速放緩及美國政府以短債支持其財政支出影響，孳息曲線短端上移，令債券價格受壓。人工智能算力需求擴張，半導體供應鏈企業持續盈利，資金隨著中東地緣衝突稍緩而湧向科技股及能源成本敏感板塊，帶動美股在第2季再創新高。環球股市普遍在季內大幅上漲，並在短暫震蕩后再次攀升。基金在本年至今錄得7.47%回報。鑒於美國經濟仍受通脹持續高於目標和增長可能放緩的疑慮雙向拉扯，市場對美聯儲新任主席上台後的息率走向存有相當分歧，或有利於股票估值。另外，人工智能資本投放的可持續性和整體市場高估值等因素目前尚未明朗，且地緣政治和貿易關係緊張等在特朗普治下仍不斷反覆，投資市場特別是美股在屢創新高之餘不無暗湧。

US FED kept rates unchanged in 2026 H1. Short end of the yield curve moved up and bond prices came under pressure as economic growth slowed down and the US government uses short-term debts to support its fiscal spendings. US equities reached new high again in Q2 supported by expanding demand for AI computing power, resilient profitability along the semiconductor supply chain. Temporary easing of geopolitical conflicts in the Middle East fueled capital inflows into technology and energy-sensitive sectors. Global equities surged broadly in the quarter, pushing higher after short pullbacks. The Fund posted a YTD return of 7.47%. With the US economy torn between inflation staying above target and caution over slowing growth, markets views on interest rate trends are split as a new FED Chair took office, which could benefit stock valuation. In addition, doubts persist over factors like the sustainability of AI capital spending and high valuation of the overall market. Geopolitical and trade tensions continue to oscillate under the Trump administration, some undercurrents remain while investment markets particularly US stocks scale successive new highs.
